The screenshot shows the Kleopatra application interface. The main window is titled "Decrypt/Verify Files - Kleopatra". The "Output folder" is set to "C:/Users/comsec/Desktop". A green progress bar indicates that "All operations completed." with a 100% completion rate.

The verification results are displayed in a green box:

```
AI정리.txt.gpg → AI정리.txt:  
Valid signature by fdfg@dfgd.com  
  
Signature created on 2017년 10월 24일 화요일 오전 10:57:24  
With certificate:  
E0C1 A313 4BA8 C0F3 76D5 4E31 F860 C0A8 B19E 3480  
The signature is valid and the certificate's validity is ultimately trusted.
```

At the bottom of the dialog, there are two buttons: "모두 저장" (Save All) and "무시" (Ignore).

In the background, another window titled "모든 인증서" (All Certificates) is visible, showing a table of certificates:

	Valid Until	Detail
m		OpenPGP
		OpenPGP
